

KIEN THAI TRUNG – ANALYTICS ENGINEER

[Linkedin](#) • [Github](#) • kienthai2711@gmail.com • +84945613721 • Hanoi, Vietnam

Summary

Detail-oriented **Data Analyst** with **over 1 year of experience** in Healthcare and Marketing Analytics. Skilled in **SQL, Python, and Data Visualization** (Looker Studio/Power BI), I specialize in transforming raw data into actionable insights that drive platform performance and operational efficiency. With a **Pharmacy degree** providing deep domain understanding, I am now expanding my technical skillset into **Data Engineering** (ETL, BigQuery, Airflow) to build scalable data solutions. Eager to leverage this unique blend of **analytical rigor** and **emerging engineering skills** to contribute to a data-driven HealthTech environment.

Education

Hanoi University Of Pharmacy

Faculty of Pharmaceutical Management and Economics

Hanoi, Vietnam

Sep 2019 – Aug 2024

Experience

Data Analyst | Phuong Dong General Hospital & Phuong Dong Asahi Elderly Care and Resort Complex

Hanoi, Vietnam

Jan 2025 – July 2025

- Collaborated with Marketing team to analyze **digital platform traffic** and **lead generation** flow, identifying trends that improved conversion rates by **17%**.
- Built automated **Looker Studio dashboards** to track daily **user engagement** and hospital traffic, serving as the "**One Source of Truth**" for the Board of Directors.
- Performed **data cleaning and validation** on patient datasets, ensuring 99% accuracy for operational reporting.
- Established a BigQuery warehouse to centralize data sources, automating recurring reports and reducing manual work by 50%.
- Automated extraction of YouTube analytics via n8n, integrating outputs into Google Sheets and Looker Studio for holistic platform reporting.

Analytics Engineer | Mevis Healthcare

Hanoi, Vietnam & Vinh Phuc, Vietnam

Sep 2025 – Nov 2025

- ETL Pipeline Refactoring:** Optimized data infrastructure to support high-concurrency access for the Sales/Operation portal, ensuring **99% data availability** for business users.
- Data Product Development:** Engineered the data infrastructure for a High-Concurrency User Portal, facilitating real-time data access for thousands of users.
- Strategic BI Implementation:** Deployed advanced BI dashboards on **Looker Studio** to convert raw operational logs into actionable strategic insights for leadership.

Freelance Data Instructor

ComeEco Company

BI Developer, Excel Trainer

Hanoi, Vietnam

May 2025 – July 2025

- Designed and deployed a comprehensive **Financial Reporting System** using **Power BI**, utilizing complex **DAX measures** for Year-over-Year (YoY) and Month-over-Month (MoM) growth calculations.
- Automated data flows to provide the CEO with **real-time financial forecasts**, replacing manual Excel reports and saving **50% of reporting time**.
- Delivered hands-on training on **Advanced Excel (Pivot, VLOOKUP, Formulas)** and Data Visualization to internal staff, enhancing the team's data literacy.

Xóm Data

Data Content Creator & Administrator

Hanoi, Vietnam

April 2025 – Now

- Founded and scaled a Data Community from 0 to **20,000 members** in 70 days and **55,000 members** in 6 months using **Data driven Content Strategy** and engagement metrics analysis.

- Managed community growth KPIs, analyzing member behavior to optimize content reach and engagement rates.

Technical Skills

- **Domain knowledge**
 - **Healthcare & Pharma Insights:** Strong understanding of Medical terminologies, Patient Journey, and Pharmaceutical product lifecycles (based on Pharmacy background).
 - **Digital & Platform Analytics:** Tracking User Engagement, Traffic Analysis (Pageviews, Sessions), Conversion Funnels, and Content Performance metrics.
 - **Business Operations:** Experience in automating reporting workflows and ensuring data accuracy for cross-functional teams.
- **Hard skills**
 - **Advanced SQL & Database Management:**
 - Proficient in complex data retrieval and manipulation using **Window Functions**, **CTEs (Common Table Expressions)**, and Nested Queries to handle high-volume datasets.
 - **Google BigQuery (Data Warehousing):** Experienced in designing schemas and applying optimization techniques like **Partitioning** and **Clustering** to improve query performance and reduce costs.
 - Familiar with RDBMS management including **PostgreSQL** and **MySQL**, capable of writing Stored Procedures and handling database constraints.
 - **Data Visualization & Business Intelligence:**
 - **Google Looker Studio:** Skilled in connecting multiple data sources (BigQuery, Google Sheets, GA4) to build automated, interactive dashboards for tracking platform performance and user engagement.
 - **Microsoft Power BI:** Proficient in Data Modeling and **DAX (Data Analysis Expressions)** for complex calculations. Experienced in advanced features such as **Drill-through**, **Bookmarks**, and **Dynamic Parameters** to create compelling data stories.
 - **Data Engineering & ETL Automation (Junior Level):**
 - **ETL Pipelines:** Hands-on experience in building and maintaining data pipelines to ingest, clean, and transform raw data from various sources (APIs, Web Scraping) into Data Warehouses.
 - **Workflow Orchestration:** Fundamental understanding of **Apache Airflow** for scheduling and monitoring data workflows.
 - **Automation:** Experienced in using **n8n** and Python scripts to automate recurring reporting tasks and data extraction processes, ensuring data freshness and accuracy.
 - **Python for Data Analytics:**
 - Proficient in using **Pandas** and **NumPy** for advanced data cleaning, transformation, and statistical analysis.
 - Experienced with visualization libraries like **Matplotlib** and **Seaborn** for Exploratory Data Analysis (EDA) and identifying trend patterns.
 - Capable of writing reusable Python scripts for web scraping (**Selenium**, **BeautifulSoup**) and data integration tasks.
- **Soft skills**
 - **Data Storytelling & Communication:** Proven ability to translate complex datasets into actionable insights for non-tech stakeholders (Directors, Marketing Teams).
 - **Extreme Ownership & Leadership:** Founder/Admin of "Xom Data" (20,000+ members) – Demonstrated strong sense of responsibility, community building, and knowledge sharing.
 - **Detail-Oriented & Accuracy:** Experience handling sensitive Healthcare/Medical data, ensuring 99% data integrity and precision in reporting.
 - **Adaptability & Growth Mindset:** Thrives in fast-paced environments, self-taught new technologies (Airflow, Docker) to solve business problems independently.

Personal Projects

1. VPI Hospital Reporting Automation (ETL Project)

Oct 2025 – Nov 2025

- **Github:** https://github.com/kina2711/vpi_etl_pipeline
- **Objective:** Architect and deploy a robust ETL pipeline to automate the synchronization of high-volume hospital data (Revenue, Insurance, Patient Records) from on-premise PostgreSQL to Google Sheets for BI visualization.
- **Skills Used:** Python (OOP), SQL (PostgreSQL), Google Sheets API, ETL Architecture, Batch Processing, Error Handling, Windows Task Scheduler.
- **Description:**
 - Designed a configuration-driven ETL pipeline using Python with a modular OOP architecture (Connectors, Pipelines, Configs), enabling easy scalability without code changes.
 - Implemented smart batch processing logic (splitting queries by date ranges and data chunks) to optimize database performance and bypass Google API payload limits.
 - Engineered advanced retry mechanisms with exponential backoff to handle network instability and API quota errors, ensuring 99% pipeline reliability.
 - Developed flexible data loading strategies (Overwrite vs. Append) and a workaround algorithm for Google Sheets' row deletion limitations.
- **Results:**
 - Successfully automated 4 critical daily reports, reducing manual data preparation time by **90% (approx. 15 hours/week)**.
 - Eliminated data discrepancies and manual errors through automated validation and logging.
 - Enabled real-time monitoring of hospital revenue and patient flow for the Board of Directors via auto-updated dashboards.

2. VPI Health - Patient Care & Booking Platform

Sep 2025 – Nov 2025

- **Github:** <https://github.com/kina2711/vpi-health>
- **Objective:** Develop a comprehensive web application to digitize the patient journey at VPI Hospital, enabling online appointment booking and secure medical record access.
- **Skills Used:** React.js, TypeScript, Supabase (PostgreSQL & Auth), Tailwind CSS, Vercel, UI/UX Design, API Integration.
- **Description:**
 - Engineered a responsive patient portal using Next.js and TypeScript, focusing on performance and accessibility for pediatric patients' families.
 - Implemented secure authentication (Phone/OTP) and real-time database interactions using Supabase to manage user profiles and appointment slots.
 - Designed a user-friendly interface with Tailwind CSS, featuring doctor selection, calendar scheduling, and digital medical history viewing.
 - Integrated with the hospital's core system (via API) to synchronize patient data and appointment status in real-time.
- **Results:**
 - Streamlined the check-in process, potentially reducing patient waiting time by **30%**.
 - Provided 24/7 access to medical records, improving transparency and parental engagement in pediatric care.
 - Built a scalable architecture ready for future telemedicine feature expansion.

3. TikTok Data Scraping and Analysis

May 2025 – Jun 2025

- **Github:** https://github.com/kina2711/scrape_tiktok
- **Objective:** Extract and analyze TikTok data using Selenium to identify trends and inform marketing content strategies.
- **Skills Used:** Python, Web Scraping, Data Cleaning, Looker Studio, Trend Analysis, Marketing Insights.
- **Description:**
 - Scrape TikTok data over 2 months using Selenium with automated login via tiktok_cookie.pkl, collecting metrics like views and hashtags.
 - Clean and export data to CSV, upload to Google Sheets, and integrate with Looker Studio for dashboards to visualize trends. Derive marketing insights from engagement patterns.
- **Results:**
 - Aligned content strategies with trends, boosting audience engagement by **12%**.
 - Improved campaign relevance, raising click-through rates by **8%**.

- Reduced manual effort by **50%** through automated data collection.

4. Customer 360 (RFM Model)

Feb 2024 – Feb 2024

- **Github:** https://github.com/kina2711/customer_360
- **Objective:** Segment customers using the RFM (Recency, Frequency, Monetary) model to enhance engagement and retention strategies.
- **Skills Used:** SQL, Power BI, Data Cleaning, RFM Analysis, Customer Segmentation, OLTP to OLAP Transformation, Campaign Strategy.
- **Description:**
 - Analyze customer transaction data over a 3-month period using the Recency, Frequency, Monetary (RFM) model to segment customers into groups such as o Champions, Loyal, At Risk, Hibernating, and New Customers.
 - Transform data from OLTP to OLAP systems to facilitate easier analysis and create Power BI dashboards for visualizing customer segments.
 - Develop marketing campaign strategies for each customer group based on RFM analysis.
- **Results:**
 - Optimized customer engagement by targeting specific segments (e.g., Champions, At Risk) with personalized strategies.
 - Increased customer retention by **15%** and reduced churn in high-risk customer segments by **20%**.
 - Enhanced marketing campaign effectiveness, leading to a **10%** increase in conversion rates.

5. FPT Customer Sentiment Analysis

March 2024 – April 2024

- **Github:** https://github.com/kina2711/customer_sentiment_analysis
- **Objective:** Analyze customer feedback to measure sentiment and improve customer service strategies and engagement.
- **Skills Used:** Python, Natural Language Processing (NLP), Data Visualization, Sentiment Analysis, Machine Learning, Data Cleaning, Text Processing.
- **Description:**
 - Collect and preprocess customer feedback from multiple sources.
 - Apply Natural Language Processing (NLP) techniques to extract sentiment from customer comments and reviews.
 - Build machine learning models to classify sentiment as positive, negative, or neutral.
 - Visualize sentiment trends over time to identify areas for improvement in customer service.
- **Results:**
 - Identified customer sentiment trends, improving customer satisfaction by **25%**.
 - Reduced customer complaints by **15%** by addressing pain points in service delivery identified from sentiment analysis.
 - Improved customer engagement by targeting specific sentiment-based groups, resulting in an **18%** increase in customer loyalty.

Certifications

- **Google Data Analytics Professional Certificate** (Coursera – 2024)
- **Google Advanced Data Analytics Certificate** (Coursera – 2024)
- **Google Bussiness Intelligence Certificate** (Coursera – 2024)
- **SQL (Advaced) Certificated** (Hackerrank – 2024)
